FRESH BIDS UNLIKELY IN CURRENT VOLATILE MARKET ENVIRONMENT

A ₹90K-cr price tag derailed IDBI stake sale

PRASANTA SAHU

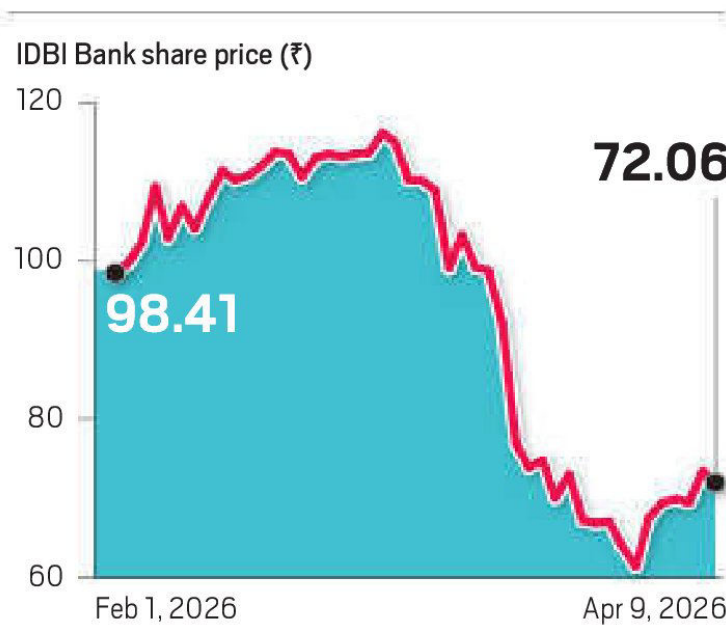

New Delhi, April 9

THE BID FOR a strategic sale of a 60.72% stake in IDBI Bank unraveled because of a steep reserve price of ₹90,000 crore, derailing a process that began in March 2021, sources told FE.

In strategic disinvestment, the reserve price – set confidentially by an Inter-Ministerial Valuation Committee (IMVC) based on independent assessments from the transaction adviser and valuer – acts as the minimum acceptable bid. KPMG India served as the transaction advisor for this deal.

Many in the government were “surprised” by the “very high” reserve price, which suggested an overestimation of the bank’s valuation, sources said. IDBI Bank sale ended up as a missed opportunity to create a template for future bank pri-

the time, IDBI Bank’s market capitalisation stood at about ₹1.15 lakh crore, with shares priced at ₹106.92 on the BSE. However, the reserve price implied the lender’s valuation of ₹1.48 lakh crore – around 29% higher than the market value as of February 6.

Since then, the stock has fallen to ₹72.06 as of Thursday, reducing market capitalisation to ₹77,482 crore, partly due to broader market weakness linked to the West Asia conflict. Although the transaction has failed, a review meeting will soon determine the next steps. Fresh bids are unlikely in the current volatile market environment.

The bids received were “well below” the reserve price, which the sources added, without giving details.

The process has remained confidential, which is standard

in strategic disinvestment deals. While four entities were shortlisted, two were understood to have put financial bids, including Fairfax Financial Holdings.

ment of Investment and Public Asset Management (DIPAM) received financial bids for a 60.72% stake – comprising 30.48% from the government and 30.24% from LIC – along with management control. At

Govt aims to cut steel emissions by 25%

NEHA ARORA

New Delhi, April 9

STEEL MILLS AIM to cut carbon emissions by about a quarter over the next decade and reduce reliance on coal, while the world’s second-biggest producer of the alloy plans to more than double output.

Under the proposed “National Steel Policy 2025”, the Centre aims to cut emissions from steel mills to 2 metric tonne of carbon dioxide per tonne of finished steel by 2035-36, according to a draft cabinet note dated March 10.

The new emissions reduction target has not been previously reported.

Steelmakers emit about 2.65 tonne of carbon dioxide per tonne of finished steel, roughly 32% higher than the global average of 2 tonne, and account for 10-12% of the country’s total emissions.

India has been hit by the European Union’s carbon border tariff, which from January this year imposed fees on imports of steel, cement and other high-carbon goods, forcing the country to scout for alternative export markets.

The policy proposes promoting gas-based steelmaking, increasing the use of steel scrap, and offering incentives for continuous emission reduction.

It also calls for collaboration with the oil ministry to secure overseas gas supplies and partnerships.

Only 21% of blast furnace capacity and 59% of direct reduced iron (DRI) capacity or sponge iron produced using gas or coal without melting it have access to gas pipeline infrastructure. As steelmaking capacity grows, decarbonising the sector is crucial for meeting India’s net-zero emissions target by 2070. Buoyed by rapid economic expansion India has set a target to expand crude steel capacity to 400 million tonne by 2035-36.
